

Gammon Career Opportunities

The modern construction industry of the 21st century offers a range of dynamic career opportunities both on site and office based. As a major contractor offering integrated services, Gammon's staff come from a diverse range of backgrounds. Typically the work and career paths can be divided into these main areas:

Project Management

Engineers (building, structural, civil, planning, electrical, mechanical, building services, geotechnical, quality control etc.), design managers, planners, project managers and directors

Design & Engineering

Geological engineering, temporary and permanent works design and delivery, BIM delivery, drafting, specialist design, and engineering management

Central Services

Site administration teams, procurement, finance, human resources, legal, insurance, information technology, corporate communications, public relations, systems assurance, quality and risk management

Site Operations

Skilled workers, supervisors, surveyors, site agents, and production managers

Commercial Management

Quantity surveyors, estimators, and commercial managers

Laboratory Operations

Chemists, geologists, technicians

Digital and Innovation

Supporting the implementation of innovative ideas, technology and digital engineering on projects

Safety, Sustainability, Environment, and Healthcare Professionals

Nurses, safety officers and managers, environmental officers and sustainability specialists

Plant Operations

Material specialists, plant operatives, mechanics, mechanical engineers, maintenance technicians, and drivers

For young potential employees, we offer various opportunities for craft and technical apprenticeships, graduate trainees, fellowship programmes, and other summer trainee / intern positions.
